Personal Computer Repair

Overview

McLennan Community College is only able to assist with issues connecting to or utilizing our services. We are unable to provide support for the device itself, such as with hardware or operating system issues.

Getting Started

- If your device is under warranty, we recommend contacting the manufacturer's warranty department to determine if that type of repair would be covered. Most warranties will cover hardware issues for one year, but it is possible to have additional coverage and/or for longer periods.
- If your device is no longer under warranty or the repair would not be covered, we recommend contacting a local computer repair shop to assist you. Performing a Google search for "computer repair [insert city name, TX]" can help you locate nearby businesses and read recent reviews regarding their service quality.
