Access High School Pathways and reset password

Overview

This article covers accessing the High School Pathways site and resetting your password.

Getting Started

The High School Pathways can be accessed at https://gateway.mclennan.edu.

Reset your password for High School Pathways

- To reset your High School Pathways gateway password, go to

  https://gateway.mclennan.edu.
- Select 'Forgot Password'.
  - If you do not receive a password reset email by entering in your MCC username, select the 'Update Email' form link on the 'Forgot Password' page.
  - Fill out the information as requested to update your email address on file.
  - Once updated, retry the 'Forgot Password' process. We recommend using your username, not email, here as well as on the Student Login page.
- Once you receive the email from the system with a temporary password, please click the 'Student' login button the High School Pathways page and sign in using your MCC username and temporary password.
  - The temporary password is letters and numbers only, it does not include the space before or the period afterwards.
- Once signed in, there will be a 'Change My Password' button to update your password to one of your choosing. Please use only letters and numbers in your new password.

Reset your password for McLennan Community College

Once you have enrolled in the dual credit program and registered for class(es), we recommend resetting your [MCC password](#).

This process will reset your password across all of our systems so you will be able to sign in to Brightspace, MCC student email, MyMCC, and the High School Pathways portal using the updated MCC password. Again, please use only letters and numbers in your new password and it also should not include any of your personal information (e.g. name, initials, date of birth, ID).
