

# Lockdown Browser will not install on Windows S-Mode

## Overview

These instructions are for removing S-Mode from your Windows 10/Windows 11 computer to allow the installation of the lockdown browser. S-Mode is a more limited, locked-down version of Windows and only allows installing applications/software from the Microsoft Store. Once the device is switched out of S mode, it cannot be switched back.

## Getting Started

**Proceed with caution.** Once the device is switched out of S-Mode, it cannot be switched back. S-Mode can be removed in two ways, via the About Pane or the Activation Pane. Both options are included below.

### Remove S-Mode 'About Pane' Instructions

- Go to Settings > System > About pane.
- Scroll down to the Windows Specification section.
- Look for the Edition entry. If it says Windows 10 in S Mode or Windows 11 in S Mode the operating system is in S Mode.
- To leave S Mode, go the Microsoft Store app. In the search box, type in **Switch out of S Mode** and press **Enter**. This should take you to the S Mode page.
- Press the blue **Get** button and restart the computer.
  - The computer should now be out of S Mode and the LockDown Browser should install normally using the link provided in Brightspace.

### Remove S-Mode 'Activation Pane' Instructions

- Go to Settings > System > Activation pane.
- In the Switch to Windows 10 Home section, select Go to the Store.
  - (If you also see an **Upgrade your edition of Windows** section, be careful **not** to click the **Go to the Store** link that appears there.)
- On the Switch out of S mode (or similar) page that appears in the Microsoft Store, select the **Get** button.
- You see a confirmation message on the page.
  - you will be able to install apps from outside of the Microsoft Store (including the LockDown Browser) if not prompted to restart your device.

- Restart the computer, if prompted, to apply the change.

## Unable to switch out of S-Mode

If you are attempting to disable S-Mode on your personal-owned computer but are getting a message indicating that you need to check with IT or System Admin, despite being signed into your personal account or am an admin on the device, you may be signed into the Microsoft Store with a work or school account with app install restrictions in place (as with our MCC accounts). Follow the instructions below to verify you are signed into such an account on your device and remove it:

- Open the Start Menu and then click on the gear icon on the left for Settings.
- Select Accounts.
- Select the Access work or School tab on the left-hand side.
- Click on the businesses account (school or work), then click on Disconnect or Remove.
  - Removing these accounts will not actually remove your organization email from individual apps. It will only remove it from the operating system. Make sure to remove all organization accounts, as these may have the install restrictions associated with them.
- Close out of the Microsoft Store, where the button is greyed out.
- Go back to the article, and click on the Open Microsoft Store button again. 'Get' should be enabled now.

## Technical Support

If you are unable to remove S-Mode from your computer Help Desk recommends you contact a local computer repair shop for further assistance. Until the issue is resolved, there are workstations available for student use in the library that have the LockDown Browser installed. You may also contact your instructor to request a [IREPO checkout laptop](#).
